

Please DO NOT pass this amendment! Allowing the use of cell phones on airplanes would only add to the already stressful environment we as flight attendants have to work in daily. People do not listen to our safety demos and instructions as it is, the use of cell phones in flight would only make matters worse, not to mention invade the privacy of other passengers trying to rest and/or work during the flight. The safety of our passengers is our number one concern, please do not endanger that safety or give would be terrorists anymore ammunition to use.
